1. Executive Summary & Site Overview

MyCelebrityBookings.com is a **celebrity booking agency** website. It is *not* an e-commerce store and does **not** process payments online. It is a **lead-generation / inquiry-based booking platform**: visitors browse a directory of celebrities, read bios, pick a service type, and submit a **booking-inquiry form**. The agency then follows up offline (by email/phone) to negotiate price, confirm availability, and arrange payment manually.

One-line summary: A brochure + directory + inquiry-form website for a celebrity booking agency. The "booking" is really a *lead capture*; the actual transaction (pricing, contracts, payment) happens off-site via email/phone.

What the site contains (at a glance)

- **Directory** A paginated **Celebrity Directory** (~80+ celebrity profile pages across 4+ pages)
- **Profiles** Individual **Celebrity Profile pages** with bio, photo, Wikipedia link, "Book This Celebrity" button, and comments
- **Pages** An **About** page (agency description, 16–20 years experience, named agent "Nick Kallas")
- **Pages** A **Celebrity Services** hub page + **9 service sub-pages**
- **Forms** A **booking-inquiry form** repeated on every service page (Date, Time, # persons, Name, Email, Phone, Special requests)
- **Taxonomy** A large **category/tag system** (actors, actress, singer, producer, etc. — ~90+ categories)
- **Social** **Testimonials/reviews** widget (Google-style star reviews)
- **Social** **Comments** on celebrity profiles ("Leave a Reply" WordPress form)
- **Legal** A **Disclaimer** block on every page
- **Contact** Contact channels: email `my@managementbookings.online` , phone `+1 209 621 0270`

2. Technology Stack & Platform Detection

Aspect	Detection Evidence	Conclusion
CMS	Post pagination ("Older posts →"), "Leave a Reply" comment form, category counts in parentheses, "Search for:" widget, widgetized sidebar, post navigation ("Bad Bunny →")	WordPress (self-hosted)
Theme	Custom/light theme; "Slide Anything Popup Preview" menu item (a WP plugin)	Custom theme + plugins
Plugins (inferred)	Comments (native), a form plugin for the booking form, a popup/slider plugin ("Slide Anything"), a reviews/testimonials plugin (Google-style stars)	WP plugin stack

Payment gateway	No "Add to cart", no checkout, no price display, no Stripe/PayPal markers anywhere	None online — manual/offline
SEO	Category-heavy taxonomy, keyword-stuffed bios, "Select Category" dropdowns	SEO-driven content marketing

Key takeaway for your build: The reference site is a *WordPress brochure site*. You can build a far better version as a custom web app (React/Next.js + Node API + database) with a real admin panel, real payment, and real email tracking.

3. Site Map & Information Architecture

```
HOME (/) — redirects to /celebrity/ directory listing
|
├─ Celebrity Directory (/celebrity/) [paginated: page 1-4+]
|   └─ Celebrity Profile (/celebrity//) ×80+
|       ├── Bio (Wikipedia-sourced)
|       ├── Photo
|       ├── "Book This Celebrity" button → booking form
|       └─ Comments (WordPress "Leave a Reply")
|
├─ About (/about/)
|
├─ Celebrity Services (/celebrity-services/) [HUB]
|   ├── Autograph Signing (/autograph-signing/)
|   ├── Private Reservations (/private-reservations/)
|   ├── Celebrity Meet and Greet (/celebrity-meet-and-greet/)
|   ├── Charity Foundation/Events(/charity-foundation-events/) [404 at crawl time]
|   ├── Product Endorsements (/product-endorsments/)
|   ├── Nightclub Appearances (/nightclub-appearances/)
|   ├── Business Promotion & Adverts (/business-promotion-adverts/)
|   ├── Tradeshow Appearance (/tradeshow-appearance/)
|   └─ Corporate Events (/corporate-events/)
|   [each service page ends with the same booking-inquiry form]
|
├─ Promotion (/promotion/) [linked in nav; 404 at crawl time]
├─ Book a Celebrity (/book-a-celebrity/) [linked in nav; 404 at crawl time]
|
└─ GLOBAL (every page):
    ├── Header: logo "Bookings", nav menu, search box
    ├── Sidebar: Celebrity Services list + Categories list
    ├── Testimonials widget (Google star reviews)
    ├── Disclaimer block
    └─ Footer: repeat of nav menu
```

Note: "Promotion", "Book a Celebrity", and "Charity Foundation/Events" returned HTTP 404 at crawl time — they are listed in the navigation but the pages are either deleted, renamed, or mis-linked. This is a content-management gap you should *not* replicate.

4. Global Layout & Shared Elements

Every page on the site shares the following chrome:

Region	Contents
Header	Logo/wordmark "Bookings"; primary nav menu (Celebrity, About, Celebrity Services ▾, Promotion, Book a Celebrity); a "Search for:" search widget

Primary Nav (dropdown)	Celebrity Services expands to 9 sub-items + "Slide Anything Popup Preview" (a plugin artifact)
Sidebar (right)	"Celebrity Services" link list (14 links); "Categories" list (~90+ categories with post counts); Testimonials/reviews widget
Testimonials widget	Two visible reviews dated 10 Nov 2025, both 5-star Google-style: "This agency is strict and very discreet, the security during the meet was wonderful" and "i'm Grateful to this agency i had the opportunity to meet Keanu Reeves" — by "Tracy Shades"
Disclaimer block	Standard legal text (see §14) appearing on every page
Footer	Repeat of the main nav menu (Celebrity, About, Celebrity Services ▼, Promotion, Book a Celebrity)
Category filter widgets	Multiple "Select Category" dropdowns (Male Actors, Writers, Film Producer, Producer, etc.) that filter the celebrity directory

5. Section: Celebrity Directory (Listing)

URL: `/celebrity/` (also acts as the homepage)

Structure

- **Grid/list of celebrity cards**, each showing the celebrity's name as a clickable heading linking to their profile.
- **Pagination** at the bottom: "1 2 3 4 Older posts →" — indicating 4+ pages of celebrities.
- Page 1 sample names: Colin Farrell, Bad Bunny, Elon Musk, Sheryl Suzanne Crow, Stjepan Hauser, Johannes Oerding, Kaitlan Collins, Henry Cavill, Susanna Hoffs, Paul McCartney, Adeline Rudolph, Method Man, Martins Short, Sveva Alviti, Kenny Chesney, Heughan Sam, Alex Scott, George Strait, Chelsea Handler, Charlie Hunnam, Jim Parsons, Richie Sambora, Tyler Hynes, Manuel Garcia-Rulfo, Gal Gadot, Peter Gadiot, Robert Pattinson, Dylan McDermott, Travis Fimmel, Brendan Fraser.
- A "Search for:" box to filter celebrities.

What each card contains

- Celebrity name (linked to profile)
- (Photo/thumbnail — rendered in browser, not captured in text)

For your educational site: Replace "celebrity" with "tutor / instructor / educator". The directory = a searchable, paginated, filterable catalog of educator profile cards.

6. Section: Celebrity Profile Page

URL pattern: `/celebrity//` (e.g. `/celebrity/colin-farrell/`)

Anatomy of a profile page

Element	Detail
H1 title	Celebrity full name (e.g. "Colin Farrell")
Biography	Short bio, often Wikipedia-sourced ("Colin James Farrell is an Irish actor. A leading man in blockbusters... [Wikipedia]") with a link to the Wikipedia article
Photo	Portrait image of the celebrity
CTA button	"Book This Celebrity" (appears twice) — triggers the booking-inquiry flow
Post navigation	Links to next celebrity (e.g. "Bad Bunny →")
Comments section	"Leave a Reply" form — fields: Comment, Name*, Email*, Website; "Save my name, email, and website in this browser for the next time I comment" checkbox

Categories	The profile is tagged with one or more categories (e.g. "actors", "Male Actors")
------------	--

Important: Profiles show *no price, no availability calendar, no booking slots*. The "Book This Celebrity" button is a lead-capture CTA, not a checkout. Price is negotiated offline.

7. Section: About Page

URL: /about/

Content summary (verbatim themes)

- "My Celebrity Bookings is a **full-service celebrity booking agency**."
- Expertise across all areas of the industry; finds the perfect celebrity for marketing/branding campaigns.
- "The power of a famous face, combined with the right marketing elements, will help enhance your image, reputation and of course, **SALES REVENUE**."
- Secures celebrity within budget and handles all production arrangements.
- List of talent types bookable: Actor, Celebrity Artist, Celebrity Chef, Celebrity Dancer, Celebrity DJ, Celebrity Event Planner, Celebrity Host, Celebrity Kid, Comedian, Fitness Professional, Home Improvement Personality, Musician, Reality Star, Sports Personality.
- List of event types: Autograph signing, Celebrity Appearances, Celebrity Judge, Celebrity Meet & Greet, Convention Appearances, Cooking Demonstrations, Corporate Events, Nightclub Appearances, Personal Appearances, Product Endorsements, Speaking Engagements, Tradeshow Appearances, TV and Radio Commercials.
- **"Over 16 years of experience"** (About page) / **"over 20 years"** (Services page) — inconsistent; note for your build to keep numbers consistent.
- Named agent: **Nick Kallas** ("Celebrity booking agent, Nick Kallas has built close relationships with all of the top celebrities...").
- Two CTAs: "Contact us NOW to start planning your event!" and "Contact us for information on the most famous celebrities, their booking fees, and availability."

8. Section: Celebrity Services (Hub)

URL: /celebrity-services/

The hub page repeats the agency pitch and lists the 9 service types. It also embeds the **booking-inquiry form** (see §11 for the full field spec).

The 9 service sub-pages

Each service sub-page follows an **identical template**: a heading "Book a Celebrity for [Service]", the same agency boilerplate paragraph, a list of talent types, the line "Email us at my@managementbookings.online to book...", a "Contact us NOW" CTA, and the booking form. The only differences are the H1 title and the first line. Below is each service with its H1 and any unique note.

#	Service	URL slug	H1 / Lead line	Unique note
1	Autograph Signing	/autograph-signing/	"Book a Celebrity for an Autograph Signing"	Email CTA
2	Private Reservations	/private-reservations/	"Book a Celebrity for Private Reservations"	Email CTA
3	Celebrity Meet and Greet	/celebrity-meet-and-greet/	"Meet and Greet a Celebrity"	Phone CTA: "+1 209 621 0270"
4	Charity Foundation/Events	/charity-foundation-events/	—	404 at crawl time
5	Product Endorsements	/product-endorsements/	"Book a Celebrity for Product Endorsements"	(note misspelling "Endorsements")
6	Nightclub Appearances	/nightclub-appearances/	"Book a Celebrity for Nightclub Appearances"	Email CTA
7	Business Promotion & Adverts	/business-promotion-adverts/	"Book a Celebrity for Business Promotion & Adverts"	Email CTA
8	Tradeshow Appearance	/tradeshow-appearance/	"Book a Celebrity for Tradeshow Appearance"	Email CTA
9	Corporate Events	/corporate-events/	"Book a Celebrity for Corporate Events"	Email CTA

Observation: The 9 service pages are ~95% duplicate content (same boilerplate). Only the H1 and lead line differ. For your educational site, give each service *genuinely distinct* descriptive copy.

11. The Booking Form (Field-by-Field Spec)

The same booking-inquiry form appears on the Celebrity Services hub and on every service sub-page. This is the **core conversion mechanism** of the entire site.

#	Field label	Type	Required?	Options / format
1	Date	Date picker	Yes (marked ***)	Calendar date
2	Time	Dropdown	No	11:00 AM, 11:30 AM, 12:00 PM, 12:30 PM, 1:00 PM, 1:30 PM, 2:00 PM, 2:30 PM, 3:00 PM, 3:30 PM, 4:00 PM, 4:30 PM, 5:30 PM, 6:00 PM, 6:30 PM, 7:00 PM, 7:30 PM, 8:30 PM, 9:00 PM, 9:30 PM, 10:00 PM, 10:30 PM
3	Number of Persons	Dropdown	No	1 person, 2 person, 3 person, 4 person, 5 person, 6 person, 7 person, 8 person, "please call us for 9 and more people"
4	Name	Text input	Yes (marked ***)	Free text
5	E-mail	Email input	Yes (marked ***)	Validated email
6	Phone	Tel input	Yes (marked ***)	Phone number
7	Special requests	Textarea	No	Free text (event details, celebrity choice, etc.)
8	Submit	Button	—	"Submit"

Notable gaps in the reference form: No celebrity selector (which celebrity?), no service-type selector (which service?), no budget field, no event location/address, no captcha/spam protection visible, no terms checkbox, no "which service" context passed with the submission. The form is generic and identical on every service page — the agency relies on the "Special requests" textarea to capture intent. *Your educational version should fix all of these.*

Form submission behaviour (inferred)

- On submit, the form data is sent to the WordPress backend (likely via a form-handler plugin or `admin-post.php`).
- The agency receives the lead by email and/or in a dashboard.

- There is **no on-screen price, no payment step, no confirmation screen** shown to the user beyond a generic "thank you" (WordPress default).

12. Categories & Taxonomy System

The site uses a WordPress category taxonomy to organize celebrities. Categories appear in the sidebar with post counts. There are ~90+ categories. They fall into a few groups:

Talent-type categories

actors (57)	actress (8)	Male Actors (80)	Comedian (1)	American comedian (1)	Singer (5)
singer-songwriter (2)	Songwriter (5)	Musician (1)	Rapper (1)	Record producer (1)	Model (1)
Broadcaster (1)	Journalist (2)	Presenter (1)	television host (1)	Television personality (1)	
television producer (1)	television director (1)	video game director (1)	Director (2)	Film Producer (1)	
Producer (11)	Writer (3)	Writers (2)	fashion designer (1)		

Individual-name categories (used as tags)

Aidan Turner, Alexander Skarsgård, Angelina Jolie, Benedict Cumberbatch, Blake Tollison Shelton, Bob Odenkirk, Brad Paisley, Brad Pitt, Bradley Cooper, Brendan Fraser, Channing Tatum, Charlize Theron, Christopher Peter Meloni, Christopher Walken, Cillian Murphy, Daren Kagasoff, David Boreanaz, David Tennant, Dylan McDermott, Gerard Butler, Gustaf Skarsgård, Hugo Weaving, Hyun Bin, Ian Murray McKellen, James McAvoy, James Spader, Jason Momoa, Jason Statham, Jeffrey Leon Bridges, Jim Caviezel, Joseph Sikora, Julia Fiona Roberts, Jussie Smollett, Katheryn Winnick, Keanu Charles Reeves, Luke Bryan, Mark Harmon, Martin Henderson, Matt Czuchry, Matt Damon, Matthew Gray Gubler, Megan Boone, Michael Bolotin, Michael Sheen, Michele Morrone, Milo Ventimiglia, Nicolas Cage, Paul Anderson, Philip Winchester, Piers Morgan, Ryan Eggold, Ryan Phillippe, Stanley Weber, Sullivan Stapleton, Taylor Jacks Kinney, Terrence Howard, Tom Cruise, Tom Ellis, Tom Payne, Trai Byers, Travis Fimmel, Will Estes.

For your educational site: Map this to a clean taxonomy: *Subject* (Math, English, Science...), *Level* (Primary, Secondary, University, Adult), *Format* (1-on-1, Group, Workshop, Course), *Language*. Avoid the reference site's mistake of mixing talent-types and individual names in one flat category list.

13. Reviews / Testimonials System

- A testimonials widget appears in the sidebar of every page.
- Reviews are **Google-style 5-star** (5 Google logo icons shown per review).
- Each review shows: reviewer avatar, reviewer name, date, star rating, review text.
- Visible reviews (dated 10 November 2025):
 - (*anonymous*) — "This agency is strict and very discreet, the security during the meet was wonderful" — 5 stars
 - **Tracy Shades** — "i'm Grateful to this agency i had the opportunity to meet Keanu Reeves." — 5 stars

- Reviews appear to be manually curated/entered (likely via a WP testimonials plugin), not pulled live from Google.

14. Comments System

- Each **celebrity profile page** has a WordPress comments section ("Leave a Reply").
- Comment form fields:
- "Save my name, email, and website in this browser for the next time I comment" checkbox.
- "Your email address will not be published. Required fields are marked *".
- Post navigation links to adjacent celebrities.
- Service pages do **not** have comments enabled (only profiles do).

15. Contact Channels

Channel	Value	Where shown
Email	my@managementbookings.online	Most service pages ("Email us at...")
Phone	+1 209 621 0270	Meet & Greet page ("Call us at +12096210270")
Booking form	7-field inquiry form	Every service page + Services hub
Comments	Per-profile comment form	Celebrity profile pages

Note the inconsistency: The email domain is `managementbookings.online` while the site is `mycelebritybookings.com` — a domain mismatch that looks unprofessional. The phone only appears on one page. Your educational site should have consistent, prominent, site-wide contact info.

16. Disclaimer & Legal

The following block appears on **every page**:

"These biographies have been collected from different sources and are provided here with minimal editing. Sometimes the biographies are oral accounts as narrated by a friend or a family member, and might include incorrect or misleading information the existing information may be found either on fan sites or similar pages. My Celebrity Bookings is not responsible for the content provided. My Celebrity Bookings acts as an entertainment broker/producer for corporate functions, private engagements and special events. My Celebrity Bookings does not claim or represent itself as the exclusive booking agent or agency, business manager, publicist, speakers bureau, pr agency or management for all of the artists or celebrities on this website."

Legal elements present: biography-source disclaimer, broker-not-agent disclaimer. **Legal elements MISSING:** Privacy Policy, Terms of Service, Cookie Policy, Refund Policy, Payment Terms, GDPR/CCPA notice. *Your educational site must add all of these.*

17. Payment Flow Analysis — How They Take Money

Direct answer to your question "how do they make payment exactly like this?": They **do not** take payment on the website. There is **no online checkout, no shopping cart, no payment gateway, no displayed prices**. The entire site is a lead-capture funnel. Here is the actual money flow:

The real payment flow (step by step)

1. **Visitor browses** the celebrity directory and service pages.
2. **Visitor submits the inquiry form** (Date, Time, # persons, Name, Email, Phone, Special requests) — no money changes hands.
3. **The form sends a lead** to the agency (email and/or WP dashboard).
4. **Agency reviews the lead** and contacts the client back by email or phone.
5. **Agency checks celebrity availability & quotes a fee** (negotiated, custom per event — hence no public prices).
6. **Client agrees** → agency sends an **invoice / contract** (off-site, e.g. via email, DocuSign, PDF invoice).
7. **Client pays** via whatever the invoice specifies — typically *bank transfer, wire, cheque, or a one-off payment link* (e.g. a Stripe/PayPal "Pay" link sent by email). This happens **outside the website**.
8. **Agency confirms booking** and coordinates the event logistics.

Payment aspect	Reference site	What you should build (educational)
Online checkout	✗ None	✓ Full checkout (cart or direct-booking pay)
Price display	✗ None (custom quotes)	✓ Transparent per-session/per-course pricing
Payment gateway	✗ None on-site	✓ Stripe / PayPal / Razorpay / Paystack
Deposit / partial pay	Manual (off-site)	✓ Deposit + balance, or pay-in-full
Invoicing	Off-site (email/PDF)	✓ Auto-generated invoices in-app
Refunds	No policy visible	✓ Clear refund/cancellation policy + admin tool
Receipts	Off-site	✓ Automatic emailed receipts + downloadable PDF
Tax/VAT	Not handled	✓ Tax calculation per region
Subscriptions	N/A	✓ Optional recurring memberships

Recommended payment flow for your educational site

1. Learner picks an educator + session/course → sees price upfront.
2. Learner clicks **Book & Pay** → checkout page (Stripe Elements / hosted checkout).

3. Card / wallet payment → **webhook** confirms payment to your backend.
4. Backend creates **Booking (status: confirmed), Payment record, Invoice.**
5. Auto-emails fire: confirmation to learner, notification to educator, receipt PDF attached.
6. Admin sees the transaction in the dashboard with full audit trail.
7. Refunds/cancellations handled in admin → triggers refund via gateway API + email notifications.

18. Email & Follow-Up System — "Did the email go through? Did they get followed up?"

This is the part the reference site handles **manually and invisibly**. For your educational site you should build it **properly and trackably**. Here is the full spec.

18.1 Email events to track (every email the system sends)

#	Email event	Trigger	Recipient(s)	Purpose
1	Inquiry received (auto-ack)	Form submitted	Customer	Confirm we got their request
2	New lead notification	Form submitted	Admin / sales team	Act on the new lead
3	New booking notification	Booking created	Educator/Talent	Tell talent they've been booked
4	Booking confirmation	Payment success	Customer	Confirm booking + receipt
5	Payment receipt	Payment success	Customer	PDF receipt
6	Invoice issued	Admin/automation	Customer	Request payment / record
7	Booking reminder (upcoming)	24h / 1h before	Customer + Talent	Reduce no-shows
8	Follow-up #1 (no response)	Lead unresponded after Xh	Customer	Re-engage
9	Follow-up #2 (quote sent)	Quote sent, no reply after Xd	Customer	Nudge
10	Post-event review request	After event	Customer	Collect testimonial
11	Cancellation / refund	Booking cancelled	Customer + Talent + Admin	Confirm cancellation/refund
12	Password reset / account	User action	User	Account management

18.2 "Did the email go through?" — Delivery tracking (build this)

The reference site has **no visibility** into email delivery. Your system should track, per email:

- **queued** — email accepted by your mail service
- **sent** — handed to SMTP/ESP

- **delivered** — receiving server accepted (SMTP 250)
- **opened** — open pixel fired
- **clicked** — link clicked
- **bounced** — hard/soft bounce (invalid mailbox)
- **complained** — marked spam
- **failed** — provider error / dropped

Use a transactional ESP with webhooks: **Resend, Postmark, SendGrid, Mailgun, or AWS SES**. Each sends webhook events for delivered/bounced/opened/clicked — store these in an `email_events` table and surface them in the admin.

18.3 "Did they get followed up?" — Lead/booking lifecycle tracking

Stage	Status value	Meaning	Auto-action
0	new	Form just submitted	Auto-ack email to customer + notify admin
1	contacted	Admin/agent reached out	Log contact attempt
2	quoted	Price sent	Start quote-expiry timer
3	negotiating	Back-and-forth	—
4	won / confirmed	Agreed + paid	Create booking + invoice + confirm emails
5	lost	Declined / no response	Archive; optional lost-reason
6	completed	Event/session done	Send review request
7	cancelled	Cancelled	Refund flow + notifications

18.4 Follow-up automation rules (build these)

- If lead stays `new` > 2 hours with no admin action → **escalation email** to manager.
- If lead `contacted` but no customer reply > 24h → **auto follow-up email #1**.
- If still no reply > 3 days → **follow-up #2** (different tone).
- If still no reply > 7 days → mark `lost` (cold lead).
- If `quoted` and quote > 7 days old → **quote-expiry reminder**.
- Every follow-up email logged with timestamp + delivery status in the lead's timeline (visible in admin).

Admin "follow-up" view to build: A Kanban/list of leads with columns = stages above. Each lead shows: source page, celebrity requested, form data, timeline of every email sent + its delivery status (delivered/opened/bounced), every manual note by staff, and SLA timers (red if a lead is aging past its follow-up deadline). This is exactly the "did they get followed up?" visibility the reference site lacks.

19. Admin Panel Blueprint — Everything You'd Need to Build

The reference site uses WordPress's default admin (hidden from the public). For your educational site you should build a **purpose-built admin dashboard**. Below is the complete module list.

19.1 Admin module overview

Module	What it manages	Priority
Dashboard	KPIs: leads today, bookings, revenue, pending follow-ups, email delivery rate	Must
Educators/Talent	CRUD profiles, bios, photos, categories, pricing, availability, status (active/inactive)	Must
Celebrity/Educator Directory	Publish/unpublish, ordering, featured flag, slug management	Must
Categories & Taxonomy	Create/edit/delete categories, hierarchy, assign to profiles	Must
Services / Event Types	Manage the service types (the 9 equivalents), per-service copy, form config	Must
Leads	All form submissions, lifecycle stages, follow-up timeline, assignment to staff	Must
Bookings	Confirmed bookings, status, dates, linked educator + customer, notes	Must
Customers / Users	Registered users, profiles, booking history, communication history	Must
Payments & Transactions	Payment records, gateway refs, refunds, status, reconciliation	Must
Invoices & Receipts	Generate, send, download PDFs; tax config	Must
Email / Notifications	Email templates, send log, delivery status per email, webhook events	Must
Follow-up Automation	Rules, SLA timers, auto-sequence config, escalation	Must
Reviews / Testimonials	Approve/reject/edit reviews, star ratings, display toggle	Should
Comments	Moderate profile comments, spam, approve/delete	Should
Pages / CMS	Edit About, Services, Promotion, Disclaimer, static content	Must
Media Library	Upload/manage images for profiles, pages, banners	Must
Promotions / Marketing	Banners, popups, discount codes, campaigns	Should
SEO	Meta titles/descriptions, slugs, sitemap, redirects	Should

Roles & Permissions	Admin, Sales agent, Educator, Customer, Moderator — what each can see	Must
Staff / Agents	Manage internal users, assign leads, performance	Should
Reports & Analytics	Revenue, conversion funnel (lead→quote→won), email metrics, no-shows	Should
Settings	Site name, contact info, payment keys, email keys, tax, legal pages	Must
Audit Log	Who did what, when (security + compliance)	Should

19.2 Detail: Leads module (the heart of "follow-up")

The single most important admin module for replicating + improving this site. Each lead record stores:

- **Source:** which page/service the form was submitted from
- **Form data:** date, time, # persons, name, email, phone, special requests
- **Requested celebrity/educator** (the reference form misses this — add it)
- **Requested service type** (the reference form misses this — add it)
- **Lifecycle stage:** new → contacted → quoted → negotiating → won/lost
- **Assigned to:** staff member
- **Timeline:** every email sent (with delivery status), every call/note logged, status changes
- **SLA timers:** time since last contact, next-follow-up due date, overdue flag
- **Value:** quoted amount, won amount

19.3 Detail: Educator/Talent profile (admin fields)

- Name, slug, photo(s), bio (rich text), Wikipedia/external link
- Categories (multi-select), tags
- Status: published / draft / archived
- Featured flag, sort order
- Pricing (per service type), currency
- Availability calendar / blackout dates
- Booking lead time, min/max persons
- Internal notes (not public)
- Linked user account (if self-managed)

19.4 Roles to support

Role	Capabilities
Super Admin	Everything, including settings & billing keys
Admin / Manager	All operational modules, not billing keys

Sales Agent	Leads assigned to them, bookings, customers, email
Educator / Talent	Their own profile, their bookings, their availability, their messages
Customer	Their bookings, invoices, messages, profile
Moderator	Reviews & comments only

20. Data Models / Database Schema

Core entities and their relationships (simplified, framework-agnostic):

Entity list

Entity	Key fields	Relationships
educator (was: celebrity)	id, name, slug, photo, bio, ext_link, status, featured, sort_order, base_price, currency, created_at	has many categories, bookings, reviews, comments
category	id, name, slug, parent_id, type (talent_type subject level)	belongs to parent; many educators
service_type	id, name, slug, description, form_config, sort_order	has many leads/bookings
lead	id, service_type_id, educator_id(nullable), date, time, num_persons, name, email, phone, special_requests, stage, assigned_to, quoted_amount, won_amount, lost_reason, created_at	belongs to service_type, educator, staff; has many events
lead_event (timeline)	id, lead_id, type (email call note status_change), body, created_at, created_by	belongs to lead
booking	id, lead_id, educator_id, customer_id, service_type_id, date, time, num_persons, status, total_amount, created_at	belongs to lead, educator, customer, service_type; has one payment, invoice
customer / user	id, name, email, phone, password_hash, role, created_at	has many bookings, leads
payment	id, booking_id, amount, currency, gateway, gateway_ref, status, method, created_at	belongs to booking
invoice	id, booking_id, number, amount, tax, status, pdf_url, issued_at, due_at	belongs to booking
email_log	id, to, from, template, subject, lead_id, booking_id, status (queued sent delivered bounced opened clicked failed), esp_message_id, created_at	belongs to lead/booking (optional)
email_event	id, email_log_id, event_type, payload, occurred_at	belongs to email_log

follow_up_rule	id, trigger_stage, delay, email_template_id, active	—
review	id, educator_id, customer_id, rating, body, status (pending approved rejected), created_at	belongs to educator, customer
comment	id, educator_id, author_name, author_email, body, status, parent_id, created_at	belongs to educator; self-referential (replies)
page (CMS)	id, title, slug, body, status, updated_at	—
availability	id, educator_id, date, available (bool), slots (json)	belongs to educator
audit_log	id, user_id, action, entity, entity_id, meta, created_at	belongs to user

21. Adapting This to an Educational Website

Mapping every reference-site concept to your educational platform:

Reference (celebrity)	Your educational equivalent	Notes
Celebrity	Educator / Tutor / Instructor	Profile with bio, photo, subjects, ratings
Celebrity directory	Educator directory (search/filter)	By subject, level, language, price, availability
Celebrity profile page	Educator profile page	Bio, subjects, reviews, availability, "Book" CTA
Service types (9)	Session/booking types	1-on-1 tutoring, Group class, Workshop, Course, Lecture, Mentoring, Exam prep, Corporate training, Webinar
Booking inquiry form	Booking + checkout flow	Add: educator select, service select, price shown, payment
Categories (actors, singer...)	Subjects + levels	Math, English, Science, Coding, Music... + Primary/Secondary/Uni/Adult
Reviews (Google stars)	Learner reviews	Verified-booking reviews only
Comments on profiles	Q&A / public questions on educator page	Optional; moderate
About page	About / Why us	Mission, tutors, process, guarantees
Promotion page	Offers / discounts / bundles	Discount codes, seasonal promos
Disclaimer	Terms, Privacy, Refund, Cookie policy	Full legal suite
Manual offline payment	Online payment + invoicing	Stripe/PayPal + auto invoices/receipts
Manual email follow-up	Automated, tracked email + follow-up engine	See §18
WP admin	Custom admin dashboard	See §19

22. Feature Gap Checklist (What to Build vs. the Reference)

Things the reference site **lacks** that you should build:

Gap	Reference	Your build
Public pricing	✗	✓ Transparent per-session/course prices
Online payment	✗	✓ Full checkout + gateway
Availability calendar	✗	✓ Real-time slot booking
Instant booking confirmation	✗ (manual)	✓ Auto-confirm on payment
User accounts	✗	✓ Learner + educator accounts
Booking history / dashboard	✗	✓ Per-user dashboards
Email delivery tracking	✗	✓ Delivered/opened/bounced per email
Follow-up automation	✗ (manual)	✓ Rules + SLA timers + escalation
Lead lifecycle / Kanban	✗	✓ Stage tracking + timeline
Analytics / funnel	✗	✓ Conversion + revenue reports
Legal pages	Only disclaimer	✓ Terms, Privacy, Refund, Cookie
Spam protection	Not visible	✓ CAPTCHA / rate-limit
Mobile UX	Basic	✓ Responsive / mobile-first
i18n / multi-currency	✗	✓ Optional
Notifications (in-app/push)	✗	✓ In-app bell + optional push
Messaging (learner↔educator)	✗	✓ Secure in-app chat
Video/session integration	✗	✓ Zoom/Google Meet links auto-generated

23. Recommended Tech Stack for Your Build

Layer	Recommendation
Frontend	Next.js (React) + TailwindCSS — SSR for SEO on directory/profile pages
Backend API	Node.js (NestJS or Express) or Next.js API routes
Database	PostgreSQL (relational — fits bookings/payments/leads) + Prisma ORM
Auth	NextAuth.js / Auth.js (email + password, OAuth, roles)
Payments	Stripe (checkout + webhooks + invoicing) — or PayPal/Paystack/Razorpay per region
Email (transactional)	Resend or Postmark (webhooks for delivery tracking) + React Email templates

File storage	S3 / Cloudflare R2 (profile photos, invoices, receipts)
Search	Postgres full-text or Meilisearch for the educator directory
Admin UI	Same Next.js app, protected routes; or a Retool/Refine admin for speed
Background jobs	Queue (BullMQ/Inngest) for follow-up automation, reminders, webhooks
Analytics	PostHog or Plausible + your own reports module
Hosting	Vercel (frontend) + managed Postgres (Neon/Supabase) + worker on Railway/Fly

Bottom line: The reference site is a simple WordPress brochure that captures leads and handles everything else manually. To "build it better" for education, keep the *directory + profile + services + inquiry* structure, but add **real pricing, real payment, real-time availability, user accounts, automated trackable email/follow-up, and a purpose-built admin** — all specified above.

Generated from public pages of <https://www.mycelebritybookings.com/> — analysis of visible content and structure only. No admin access was available; admin sections are inferred and specified as build recommendations. Some nav-linked pages (Promotion, Book a Celebrity, Charity Foundation/Events) returned 404 at crawl time.
